5 REASONS WHY

1 HIGH QUALITY—Every piece of Pease Millwork is rigidly inspected in keeping with our constant aim to provide the highest possible quality.

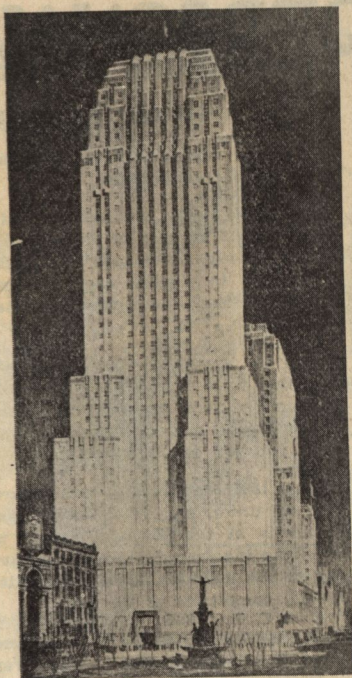

2 REASONABLE PRICES—All Pease Millwork is priced as low as possible without sacrificing quality. Pease prices are **NET**—no crating charges — and Pease pays the freight on orders of \$30.00 or more.

3 COMPLETE LINE — We concentrate on the manufacture of Builder's Woodwork, so as to be able to **FULLY** satisfy our customers. Standardized Styles, produced in Quantity, **SAVE YOU MONEY**. Our Custom Millwork Department is prepared to execute all kinds of special work promptly. We estimate from your list or from architects' plans and specifications.

4 DEPENDABILITY—The large Pease plant and our many years experience, guarantee Dependable Millwork. Careful personal attention is given to every order.

5 PROMPT SERVICE — Large stocks, maintained at our six-acre plant, insure prompt delivery to you. Whenever and wherever conditions will justify, we do long distance trucking to give delivery direct to the job.

PERSONAL MILLWORK SERVICE

A BOON TO THE BUILDER

The Pease representatives give Personal Service on the job!

Pease men are not mere "order takers"—but Specialists in Millwork problems—highly trained and fully competent to master any millwork operation—small or large—that may develop.

They go anywhere for business—ascertain your requirements—possibly make suggestions—estimate from your list or plans and specifications and give you an intelligent bid.

Should their preliminary work grow into an order, they will take measurements at the job and attend to servicing the manufacture and delivery of the material through to satisfactory completion of the job.

This Service is Entirely Free and Does Not Obligate You in Any Way

Our Personal Service Man

KNOW YOUR COST

The successful bidder often finds himself with an undesirable contract on his hands. The feeling of success in getting the contract sometimes changes to regret before the job is completed, and many a builder has been compelled to struggle through with a job that showed up "in the red" at its completion.

Know your cost, before you bid. Always protect yourself by securing a comprehensive, dependable Millwork bid from Pease—either from your list or architect's plans and specifications.

No obligation involved.

**Mission "V" Plank
(Outside)**

EXTERIOR VENEERED MISSION "V" PLANK SLAB DOORS

These popular doors are built-up, 5-ply construction, with heavy— $\frac{1}{4}$ in.—face veneers and re-inforced cores, all with waterproof glue.

The "V" grooves are cut into the face veneers to make the "mission plank" effect and are usually placed about 6 in. apart. Unless otherwise ordered these doors are shipped "V" groove, mission plank, outside and plain slab, inside.

PRICES PER DOOR — SQUARE TOP—VENEERED BOTH SIDES.
(Mission "V" Plank outside—Plain Slab Inside). All sizes, 3-0 x 7-0, $1\frac{3}{4}$ in. and smaller, same price.

**Plain Slab
(Inside)**

\$15³⁶

- A—White Pine, both sides.....
B—Red Gum or Plain Oak, one side, and White Pine, one side.....**\$20.16**
C—Red Gum or Plain Oak, both sides.....**24.66**
(In ordering please state which wood goes outside.)

If Mission "V" Plank both sides, add **\$1.00** per door.

For "Cut Out" lights (as shown below), **Open**—add price shown opposite "O", or **Glazed**—add price shown opposite "G".

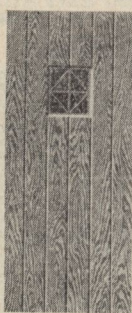

(All Glass is Clear D. S. set in metal bars).

INTERIOR VENEERED FLUSH SLAB DOORS FIVE PLY CONSTRUCTION

SELECTED VENEERS—REINFORCED CORES

These doors will not shrink or swell and will remain straight under all ordinary conditions. They are sound proof besides being wonderful resisters of heat, cold and other atmospheric conditions.

The sanitary features are superior to those of any other construction or style—there are no dust collecting surfaces.

To those interested, we will gladly mail sample section upon request.

KINDS OF WOODS

The various woods are designated as follows:

FIR—Douglas Fir; **W. P.**—White Pine; **GUM**—Plain Gum;

BIR—Plain Birch or Brown Ash; **REG**—Red Gum;

OAK—Plain Oak or African Mahogany; **MAH**—Quartered Gum or

Figured African Mahogany; **QUA**—Quartered Oak and **WAL**—Walnut.

GARAGE DOOR HARDWARE

Very often Garage Doors fail to give satisfaction because the hardware is not strong enough to support and swing them properly.

To improve this condition and insure our doors giving the customer proper service, we are now carrying hardware of the proper strength in stock, in Japan finish, complete with bolts, screws, etc., which we offer at the following prices:

No. 79—for pair of doors, per set.....\$2.70

No. 80—for three doors; one to hinge separately and the other two to hinge, fold and slide straight on front wall (inside) with rail, per set 5.00

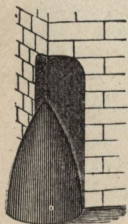

No. 80A—for three doors; to hinge together and slide around the corner (or one door can be hinged separately) with track, per set.... 6.00

SPRING BALANCED OVERHEAD GARAGE DOORS

"Spring Balanced" Overhead Garage Doors"
(Interior View—showing doors closed)

Unlike the so-called Overhead doors that "project out," Pease doors slide "straight up" and consequently are not affected by snow drifts or similar obstructions.

Pease Overhead Doors cost no more than the "projecting. out" kind and are absolutely guaranteed to operate easily and safely.

SPRING BALANCED

Overhead doors are strongly constructed of 1½ in. White Pine and glazed with clear glass. All hardware is furnished and applied. These doors slide "straight up" and overhead — entirely out of the way.

NO SPECIAL JAMBS REQUIRED

Just set your jambs the same as you would for swinging or sliding doors—leaving an opening between them of the given size, namely: 8-0 x 7-0, 8-0 x 7-6, etc. If for Mullion opening, however, at least 8 in. must be allowed for center post.

They also require 13½ in. of head room (from top of doors to ceiling) in all cases, but if you have 15 or more inches of head room, please so advise in ordering, as in the latter event we will send brackets of larger curve. The larger the curve, the easier the doors are bound to operate.

THEY CLEAR THE ENTIRE OPENING

This is not true with most overhead doors, which require at least an 8-0 x 7-6 opening to clear 8-0 x 7-0. Our 8-0 x 7-0 Spring Balanced doors will clear 8-0 x 7-0, which size is large enough for any of the present day cars.

EASY TO INSTALL—FULL DIRECTIONS WITH EACH SHIPMENT

Pease Spring Balanced doors can be easily installed by any carpenter by following the fully illustrated directions for this work which we include with each shipment, and a copy will also be mailed to your address—free—upon request.

OUR SPECIAL HARDWARE—THE CROWNING FEATURE

All hardware is included and bolted to the doors, including a heavy piece of steel at top, running full width of door—holding same firmly in shape under all conditions. All pulleys are ball-bearing and enclosed, which makes for easier operation and doubles the life of the cable—which is galvanized—and conveniently placed adjustment holes enable one to take up any possible slack that may develop in the highly-tempered, high tension springs which perfectly counterbalance the weight of the doors. The locking device is positive; turning the key on outside or knob on inside automatically releases the arms so that the doors can be opened. Engaging Cams insure sealed joints when doors are closed.

Interior View—showing how doors slide overhead

Interior View—showing how doors slide overhead

Price for Complete Set to clear opening 8-0 x 7-0 (plenty large for any present day car) with hardware mounted on doors—
all in two crates.....\$49.00 8-0 x 8-0.....\$51.00

\$47⁵⁰

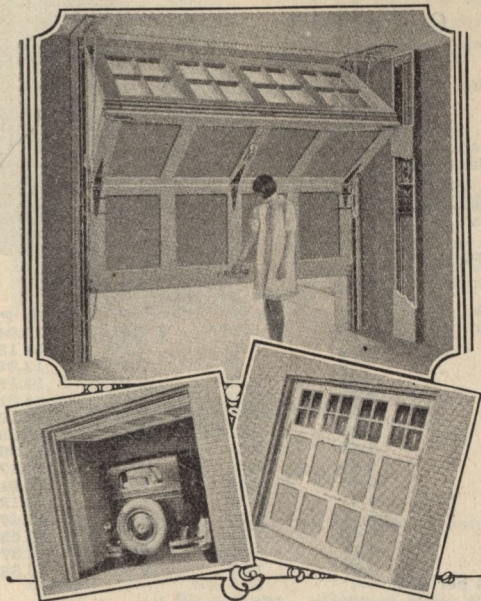

All three sizes carried in stock for immediate shipment.

WEIGHT BALANCED OVERHEAD GARAGE DOORS

Unlike the so-called Overhead doors that project out, Pease doors slide straight up and consequently are not affected by snow drifts or other similar outside obstructions. Furthermore, our doors are operated from the center—thus securing perfect balance, whereas the "projecting out" kind must be raised or lowered from the side or out of balance and consequently under a strain with the attendant danger of accidents.

Pease Overhead Doors cost no more than the "projecting out" kind and are absolutely guaranteed to operate easily and safely.

(Interior and Exterior views, shown opposite)

PEASE WEIGHT BALANCED OVERHEAD GARAGE DOORS

Strongly constructed of White Pine— $1\frac{3}{4}$ in. thick—with Fir panels. All expansion is controlled by adjustable head brackets and tight joints all around assured by doors being automatically pressed against the inside stops or casing when closed—effecting completely sealed joints. Also the sixteen vital joints are reinforced with special hardware, and the ease of operation is such that a child can open or close them.

These doors embody a new principle of operation—folding overhead and requiring only $1\frac{3}{4}$ in. of head room for all sizes, although doors 7-0 in height should be ordered for 6-6 car clearance; doors 7-6 in height for 7-0 car clearance; in other words with our Weight Balanced doors, 6 in. for car clearance should be allowed in height. On twin or multiple openings only 6 in. mullion boxes are needed, except where head room is less than 6 in., in which case 9 in. boxes are required.

EASY TO INSTALL—FULL DIRECTIONS WITH EACH SHIPMENT

Pease Weight Balanced doors can be easily installed by any carpenter by following the fully illustrated directions for this work, which we include with each shipment, and a copy will also be mailed to your address—free—upon request.

Our hardware is of special design steel and malleable iron—black japanned. Pulleys are easy running with roller bearings. Chain is twist link. Weights are in four sections. High grade cylinder lock operates in connection with spring bolts from either inside or outside.

PRICES OF PEASE WEIGHT BALANCED OVERHEAD GARAGE DOORS

Everything to complete installation is included except door frame, casing, ceiling pulley blocks and material for weight box. Not painted.

Glazed with clear glass, set with wood stops.

7-0 x 7-0	\$57.50	8-0 x 7-0	\$58.75
7-0 x 7-6	58.00	★ 8-0 x 7-6	51.50
7-0 x 8-0	58.75	★ 8-0 x 8-0	52.00
7-0 x 8-6	59.50	8-0 x 8-6	61.00
7-6 x 7-0	58.00	8-6 x 7-0	59.75
7-6 x 7-6	58.75	8-6 x 7-6	60.50
7-6 x 8-0	59.50	8-6 x 8-0	61.00
7-6 x 8-6	60.00	8-6 x 8-6	61.75
For doors shipped Open, deduct			\$1.75

★ Carried in stock—other sizes made to order only.

As our doors are squared and fitted and come with hardware all applied, one man should be able to install a set of doors in four hours.

3- 0 x 7-0	11.89	13.22	19.67	22.73

Smaller or intermediate sizes take price of next larger size.

All of our doors have

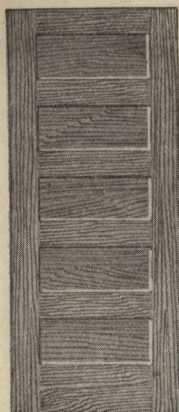

GIANT DOWEL CONSTRUCTION
(illustrated opposite)

The dowels are $\frac{5}{8}$ in. (not $\frac{1}{2}$ in.—as used by most manufacturers)—which provide 30% more glueing surface per dowel or over 30 square inches more glueing surface per door. The breaking surface is thereby increased more than 50% over the Standard $\frac{1}{2}$ -inch dowel. Thus **GIANT DOWEL** insures doors of greater strength and lasting qualities.

Special Sizes: White Pine with Fir panels, 1¾ in., 45c or 1¾ in., 50c per square foot. No door figured less than 17½ sq. ft.

All Hardwood Veneered doors, take price of next larger size.

If veneered two kinds of wood, use price of highest wood and add \$1.00 per door. Five or more Hardwood veneered doors of one size and kind, 10% less.

REINFORCED CORES

This Patented construction is used in all of our Veneered doors.

The re-inforcing pieces are thin strips of hardwood which extend the full length of the stile or rail, and to which the soft white pine core blocks are firmly cemented with waterproof glue.

These hardwood strips thus serve to strengthen the core very much the same as steel rods

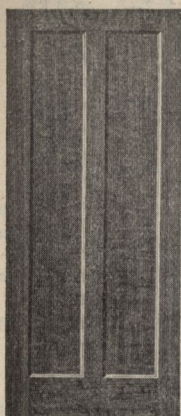

reinforce concrete. They hold the door straight and true, preventing it from warping and twisting.

MAIL CHUTES

A dark, textured book cover, possibly made of cloth or leatherette. At the top, there is a horizontal label with the word "MAIL" in a bold, sans-serif font. Below this, in the center of the cover, is a small rectangular label with some text, which is mostly illegible due to the texture and lighting. The cover appears to be part of a series, as a similar spine is visible on the left.

Models 3, 4 and 5 are for Frame or Stucco Walls from 5 to 8 in. thick and for Brick, Stone and Cement Walls from 13½ to 18½ in. thick.

SUBSTANTIAL SCREEN DOORS

WIDE STILES—LONG PANEL

For the Better Class of Buildings

Manufactured from Clear White Pine or Plain Oak as shown; liberally proportioned (4 in. Stiles) and neatly moulded inside and outside. They are covered with 16-mesh wire of best quality, either Galvanized or Antque Copper-Bronze as desired, over which a flush mould is inserted.

NOTE: Antique Copper-Bronze is stiffer and does not discolor like the ordinary Copper-Bronze wire.

Doors are $1\frac{1}{8}$ in. thick. Not painted.

Prices per door, wired as shown (without grille) and carefully crated for shipment.

Sizes	16 M. Galv.	16 M. Cop.

COPPER STEEL SIDE WALL SASH

PARKERIZED—RUST PROOF—NO PAINT REQUIRED

WHAT PARKERIZING IS—Parker Process or Parkerizing is a chemical process which changes the surface of steel to an insoluble phosphate, permanent in the

(D)

air, and under all conditions impervious to rust. This conversion is effected without any material change in dimension, contour or physical properties of the treated metal and lends itself to a variety of attractive finishes (when desired — but not necessary) both matte and polished and is

(C)

also an ideal base for paint or enamel. All of our Copper Steel Side Wall Sash are full bodied to correct proportion and guaranteed to compare favorably with any others on the market.

EXPLANATORY—(A) Cam Latch, used for Ventilators out of reach where non-automatic closing is desired. (B) Spring Catch, used for Ventilators out of reach, where automatic closing

is desired. (C) Push Bar, used on Ventilators within reach. Cam Latches are sometimes used in connection with Push Bars, but hardly ever with Chain—the Spring Catch having proved the more popular. (D) Pulley—used in connection with Spring Catch or Cam Latch—attaches to top bar of Ventilator. Where windows are placed unusually high, extra chain is required, which we will furnish at 10c per foot extra.

**PARKERIZED
RUST PROOF
COPPER-STEEL**

GARAGE SASH

This special sash is designed for private garages, and we have made the price so low that it is now within the reach of all. Can be used in any kind of wall and will fit standard concrete block construction 2 blocks wide and 4 blocks high. Masonry opening 32 $\frac{3}{8}$ in. x 34 $\frac{1}{4}$ in. requiring 4 lights 10 x 16 and 2 lights 10 $\frac{3}{4}$ x 16 in. Prices—Open, (With Glazing Clips) and Extra for Putty and Clear D. S., or Factrolite, or Rough Wired Glass.

COPPER STEEL SIDE WALL SASH

PARKERIZED - RUST PROOF - NO PAINT REQUIRED

(Fully explained on opposite page.)

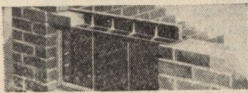

Carried in stock for Immediate Shipment.

Prices below cover sash "Parkerized" and completely equipped with Push Bar, Spring Latch or Cam Latch, Chain and Pulley (see opposite page) as may be required and Glazing Clips. Note—when Spring Catch is used, add \$1.50 each. Where it is desired to join two or more sash together—in width—a Mullion Bar is required, (quoted below) which adds two inches to the combined masonry width of two sash.

We also quote extra for Clear D. S. Factrolite or Rough Wired glass, with the necessary Metal putty for glazing same.

RIGID PRESSED STEEL LINTELS

Rigidity assured by the ribs which are placed at proper intervals to insure maximum strength.

Adaptable for use in either solid masonry or veneered wall construction over door and window openings—also fireplace arches. In extra heavy masonry walls, two lintels are generally placed back to back.

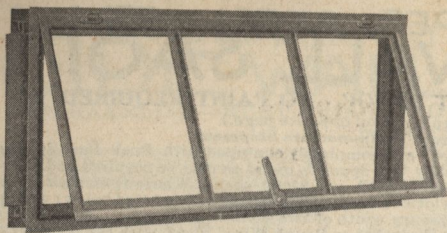

Prices per Lintel

COPPER STEEL BASEMENT SASH

Made of Heavy, Rust-resistant Copper Steel, electrically welded at every joint. The action of the hook hinges at the top and the cam action lock at the bottom is to draw the sash and frame together in a true double bearing contact all around

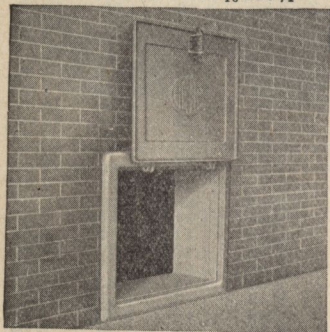

TOP HUNG SASH

which defies rain, wind or cold. Here is strong, durable, efficient construction which will stand the test of time.

Prices per Opening—Frame and Sash—as described below

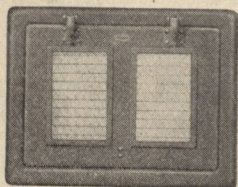

- A—Top Hung, Open, with wire clips for putty glazing (this style always sent unless otherwise ordered).
B—Bottom Hung, Open, with wire clips for putty glazing.
C—Extra for metal putty and plain glass, boxed separately.
D—Extra for metal clips and Cork lining for puttyless glazing.
E—Extra for plain glass, for puttyless glazing, boxed separately.
G—Extra for Steel Screen covered with 16 mesh Copper Bronze wire.

COPPERED SASH CHAIN

(Scene in our Sash Warehouse)

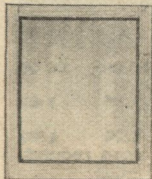

A strong copper plated chain so constructed that it will easily run through all regular pulleys, the same as sash cord. Comes in bags of 100 ft. which, with fixtures, will hang seven ordinary windows as against four where sash cord is used.

Price per bag (with fixtures) \$1.80

CLEAR WHITE PINE ONE LIGHT SASH

Take 60% of the Two Light Window price—of same glass size—(as shown opposite). For Divided Lights, add as at top of this page.

Single Sash—half price.

For Wood Weather Lip 3/4 x 1 1/8 (as shown opposite) add 30c per pair, shipped loose or 50c per pair inserted.

★ No. 19 sash are divided as follows: where opening height is 2-6, 2 lts. high; 3-2 or 3-10, 3 lts. high; 4-6 or 4-10, 4 lts. high and 5-2 or 5-6, 5 lts. high.

IMPROVED WHITCO CASEMENT SASH HANGERS

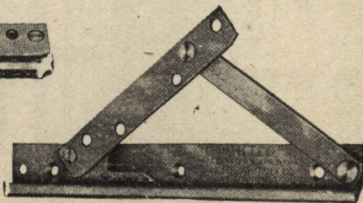

Do away with all Hinges and Adjusters and permit washing of outside of Sash from the inside of building.

(Closed)

WHITCO is a simple, self-contained unit that takes the place of both Hinges and Adjusters, for swinging and controlling Sash, either Singly, in Pairs, or in Multiple, in wide openings without mullions. The only fitting needed is a small housing at the top and bottom on each side, as the case may be; otherwise a screw-driver is the only tool needed.

WHITCO makes such effective use of the principles of leverage and friction that the Sash is held firmly in any desired position at all times. WHITCO swings either Left or Right as desired.

(Open)

WHITCO comes in complete Sets (sufficient to hang one Sash) with screws and in two finishes: (A) Rust-proof Steel, or (B) Solid Brass.

Prices per Set	A	B
8 in.—for sash, not over 3-10 high.....	\$0.88	\$1.20
10 in.—for sash not over 4-10 high.....	.96	1.28

MASTER MILLWORK GUARANTEED READY MIXED PAINTS

NOTE—We are interested in an old established paint and varnish factory, and through that connection are probably able to name you lower prices than you can secure elsewhere or strictly First Class Paints. Furthermore, as we ship FRESH FROM FACTORY, every drop will be found workable which is not always true where paint has been carried on the shelf for any great length of time.

ONE GALLON WILL COVER 350 SQ. FT.—TWO COATS

All prices are per gallon

BUY YELLOW PINE BY THE CARLOAD

SAVE \$10⁰⁰
FROM \$5⁰⁰ TO
\$5⁰⁰ PER THOUSAND FEET

MAIL US YOUR LIST TODAY FOR DELIVERED PRICES

We only need about 16,000 feet for a minimum car. Our prices, however, will be lower if car contains only Yard Stock—Joist, Studs, Dimension, Timbers, Common Boards, Sheathing and Shiplap—than if Shed Stock—Flooring, Ceiling, Siding, Partition, Finish, etc.—are included.

FINISH AND CORNICE LUMBER—KILN DRIED

ALL PRICES ARE PER HUNDRED LINEAL FEET

In Random Lengths as shown. Specified Lengths 5% extra.

While we price in "Rough" Sizes, we ship "Dressed" sizes as shown, unless otherwise specified.

COLONIAL "V" JOINT PLANK OAK FLOORING

Chemically Treated to Resist Moisture

Tongued and grooved with slightly beveled edges, which form a "V" joint when laid. Ends matched. Finished to 1½ in. thick x 4, 5, 6, 7 and 8 in. face. Shipped in equal footage of each width only. Lengths, 2 ft. and longer, with not over 5% under 4 ft.

Moderne grade is strictly Clear Red Oak and recommended where antique effect is not desired. Price per square foot (face measure).....**0.28**

Antique grade secures the true colonial effect and contains apparent defects, such as burls, knots, worm holes and curly or irregular grain, of White Oak. Price per square foot (face measure).....**0.29**

Colonial Flooring should be screwed at end joints and plugged with Round Walnut pieces ¾ in. in diameter x ¾ in. thick to represent wood pinning; these we cut from sidewood and furnish in lots of 200 for **\$2.50**.

Consists of: Style 13— $\frac{7}{8} \times 2\frac{5}{8}$ in., No. 25 Casing; Style 14— $\frac{7}{8} \times 3\frac{1}{2}$ in., No. 25-A Casing; Style 15— $\frac{7}{8} \times 4\frac{1}{4}$ in., No. 25-B Casing. REB Stops, No. 309-A Stool, Aprons (See page 58) same width as casings and to match.

WARNING!

Styles 13 or 14 can ordinarily be applied to all Door Openings without the use of "nailing cleats" or "blocks," but, on Window openings, style 13, in all cases and style 14 in some cases, must be "cleated" or "blocked out." With the above in mind, many of our customers use style 13 on their Door openings and styles 14 or 15 on their Window openings and either arrangement forms a harmonious combination.

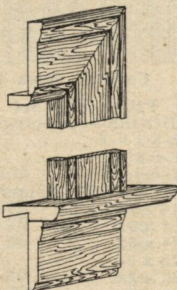

Prices Per Set—Style 13	Arkansas	Plain	Red	Plain
DOORS—(Openings)	<i>Soft Pine</i>	Gum	Gum	Oak
2-8 x 6-8	\$.95	\$1.30	\$1.40	\$1.45
3-0 x 7-0	1.00	1.35	1.45	1.50
6-0 x 7-0	1.50	2.00	2.15	2.25
WINDOWS—(Glass Size)

Add to above prices for:

Style 14	.15	.15	.20	.25
Style 15	.35	.35	.40	.50

NOTE—Smaller or intermediate sizes take price of next larger size.
For Trim Extras and Deductions, see bottom of page 54.

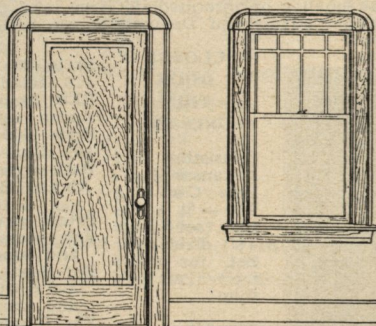

MITRE TRIM
13, 14 or 15

EVANS
PATENT
MITRE
RING
JOINT

(Rear view showing ring inserted.)

The Evans method of securing mitered joints on room trim has been very successful. This work is done on a special machine at our factory, and after the joints have been glued, metal rings ($1\frac{1}{2}$, $1\frac{3}{4}$ or 2 in. diameter—owing to width of casing) are inserted, making a perfect joint that can never open up. We will be glad to quote on this class of trim "put together" or "erected" upon request.

Corner Block Trim, 13A, 14A or 15A, same specifications as Mitre Trim Nos. 13, 14 or 15 except that Corner Blocks ($\frac{3}{32}$ in. thicker than casing) are used at the upper corners, doing away with the necessity for "mitre" joints. For prices, add to above as follows:
Style 13—40c, Style 14—45c, Style 15—50c for all woods.

Veneered Panels

• LAMINATED • VENEERED PANELS THREE PLY

Sanded two sides to thickness shown
Water Proof Glue used in all Fir panels; Regular
Glue in all others, to prevent discolorization.

FOLDING WALL SEATS

WITH OR WITHOUT SHOE POLISHING BOX

A great convenience and space saver, for Kitchen, Bath Room, or Living Room

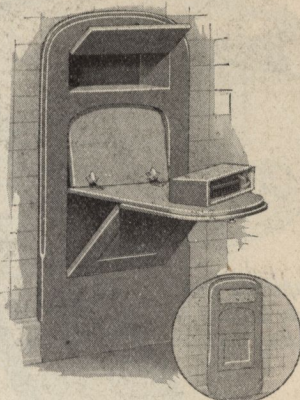

CINCINNATI

Specifications: Overall size 18½ in. wide x 31½ in. high. Seat is 12 in. wide x 14 in. deep and 18 in. from floor, when opened. Rough wall opening required. 14 in. wide x 29¼ in. high x 3½ in. deep starting 7½ in. from floor. Clear White Pine with Fir Panel in door. Complete with Nickel Plated hardware.

Price each—Carton
Packed

\$5.84

HYDE PARK

Exactly the same as the Cincinnati, except with Shoe Polishing Box and Receptacle added. By resting the foot on the box, the seat is kept clean. Overall height 37½ in. Wall-opening height 35¼ in., starting 7½ in. from floor. Clear White Pine with Fir Panel doors. Complete with Nickel Plated Hardware.

Price each—Carton

Packed

\$8.00

NEW MILK SAFE AND PACKAGE CONTAINER

22

ALMOST A NECESSITY

This cabinet baffles the petty thief and enables the housewife to secure her supplies without exposing herself to bad weather.

This cabinet sets between studs in either new or old frame walls. It requires a rough wall opening 12½ in. wide x 28 in. high x 5½ in. deep. It is made of Clear White Pine and comes all set up and complete with all hardware included and applied.

22

(Outside View)

The milk man opens the outside door—deposits the milk in inner compartment (as shown above) and then closes the door which automatically locks itself. As the inside door is opened to remove the milk, it releases the lock on the outside, so that the outside door can then be reopened. Empty bottles can be inserted from inside at any time.

PEASE VANISHING STAIR

Self-Balanced
(PATENTED)

*Completely erected
ready to place in
building*-----

*"Makes that
lost attic space
available"---*

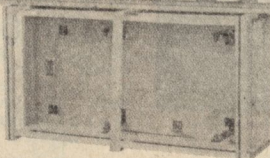

TEN GOOD REASONS FOR PEASE VANISHING STAIR

- 1—The self-balancing mechanism (patented) secures easiest possible operation.
- 2—No springs—nothing to get out of order.
- 3—New underneath controller in connection with automatic lock insures absolute safety.
- 4—Does not require as large a ceiling opening as other stairs, consequently can often be installed in closets and other similar places where it will be entirely concealed.
- 5—Costs less than any other good stair.
- 6—Comes all erected and any ordinary carpenter can anchor it in permanent position in 30 to 45 minutes, where other stairs (shipped in the knocked down) require skilled mechanics and considerably more time for installation.
- 7—Can be installed in old as well as new buildings.
- 8—Can be used for ventilation purposes during heated spells by pulling silken cord down part way (see left-hand illustration—above).
- 9—Has Oak treads at greatest wearing points.
- 10—Guaranteed against any defects and to operate perfectly.

Specifications :

Manufactured from Clear White Pine with exception of Oak starting treads and Fir panel in door. Special highest quality hardware. Stair stained a serviceable brown.

DISAPPEARING BUFFALO STAIRWAY

Of sturdy construction. Operates with greatest ease.
Practical side stair rail. Non-collapsible

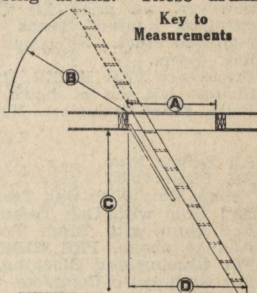

BUFFALO DISAPPEARING STAIRWAY

(Patented)

The operation is simple and easy. The action of raising and lowering is controlled by steel cables winding on powerful spring drums. These drums counterbalance the weight so stair cannot slide up or down unassisted. When not in use the stair slides up through ceiling on rollers attached to ceiling door.

Specifications: Complete Stairway includes 1 1/4 in. Ceiling Door (White Pine with Fir Panel one side, Birch one side - reversible.) Stringers 3/4 x 7 1/4 in., housed to receive 3/4 x 7 in. White Pine treads. Rigid White Pine hand rail with supports. No Jambs or Trim included. Hardware is pressed steel, Japanned. Steel cable, spring drums and three reinforcing cross rods. All hardware included. Stair stained a serviceable brown. Ceiling door not stained as this is usually painted to match ceiling. Shipped K. D. in dust proof cartons.

(Right Hand—Open String)

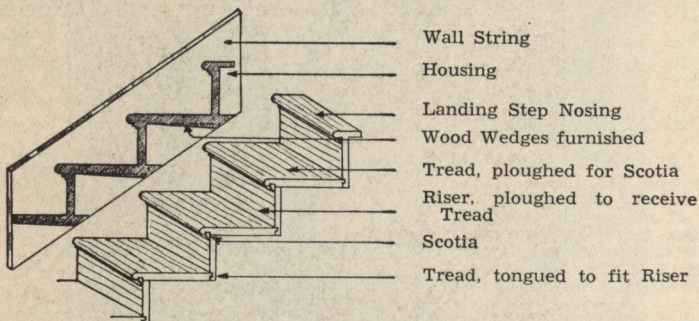

CUSTOM STAIRWORK

"TAKES THE SQUEAK
 OUT OF YOUR HOME"

Erected on the job or machined ready to erect.

Specifications: All Treads are $1\frac{1}{8}$ in. thick, nosed, ploughed to receive step scotia and tongued to fit into risers. Risers are ploughed to receive treads. Step scotia included. Treads and Risers are housed into wall strings, which are $1\frac{1}{8}$ in. thick and (for Closed String Stairs) into face strings which are also $1\frac{1}{8}$ in. thick. For Open String Stairs all treads are either nosed on exposed end or provided with mitered nosing, whenever balusters are dove-tailed into tread. Housing wedges are always included.

Following Detail shows construction of our City Custom Built Stairs.

HOW TO FIGURE CUSTOM-BUILT STAIRS

To ascertain our Exact Price, we prefer that you send us a rough sketch of EACH Flight of Stairs required—giving height from top of finished first floor to top of finished second floor—run from face of first riser to face of last riser and state whether "right" or "left" hand. For your convenience, however, we price the Complete Box or Closed String Stairway below, stringers housed, treads and risers worked as above, otherwise K. D. ready to erect. No rough carriages included. No flight figured less than four risers.

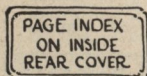

Prices are PER RISER (In the Knock Down) and include Wall and Face Strings, but add as shown on page 63, for Base Moulds, Rails, Fillet, Balusters, Newels, Facia Boards, etc.

	WIDTH OF STAIRS		
	3-0	3-6	4-0
All Yellow Pine.....	\$2.10	\$2.35	\$2.60
All Plain Oak.....	3.75	4.10	4.45
Yellow Pine With Oak Treads.....	2.95	3.25	3.55
Red Gum with Oak Treads.....	3.75	4.10	4.45
Red Gum with Birch Treads.....	4.35	4.80	5.25
Add to above, PER RISER, as follows:			
For Glueing and Blocking, add to K. D. price.....	.35	.40	.45
For Nailing Up Complete, add to K. D. price.....	1.20	1.25	1.50
For Rough Carriages (2 for 3-0 or 3-6 and 3 for 4-0).....	.75	.75	1.10
Winders count same as three steps.			
Above prices cover Box or Closed String Stairs.			
For Open String Stairs add 75c per Tread for end-nosing and mitering.			
For Open String Stairs if Balusters are wanted "dove tailed" into the Treads, add 75c per baluster.			

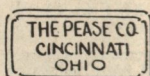

COMMON MILL CELLAR STEPS

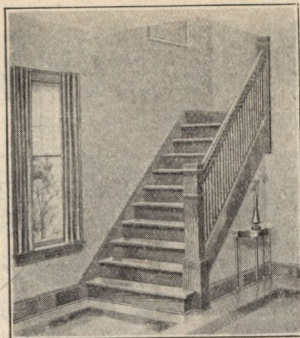

Width not exceeding three feet.

Price, per step, in the Knock Down.....\$1.40

STANDARDIZED COLONIAL STAIRWORK

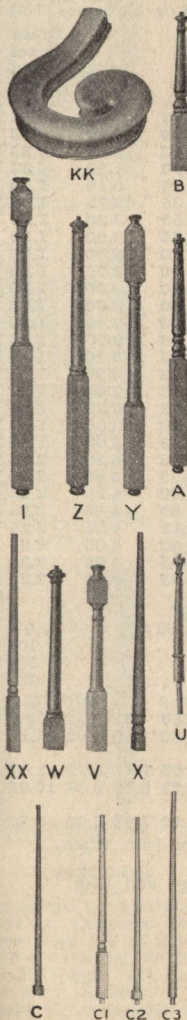

Carton Packed—Ready for Immediate Shipment

Connecting bolts included and inserted in all rail fittings.

Note—With each shipment of "KK" Volute or "Q" Easing Turnout we include full size template showing exact baluster centers in both Volute or Easing and Tread. This enables the stair builder to start right, in every instance, which should result in a perfectly fitted stairway.

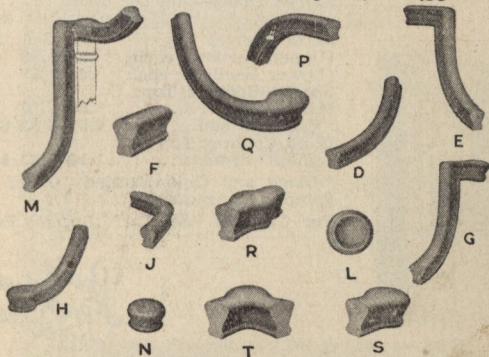

(Right Hand, Open String, Colonial)

(Please order by Symbol)

STANDARDIZED KITCHEN CABINETS

Combination 2779

2779

This combination shows the use of Kitchen Cabinets 2715 (page 67) and 2717 (page 67) butted together with a small mould used to conceal the joint. Silver Tray 2753 is an added feature.

Combination 2785

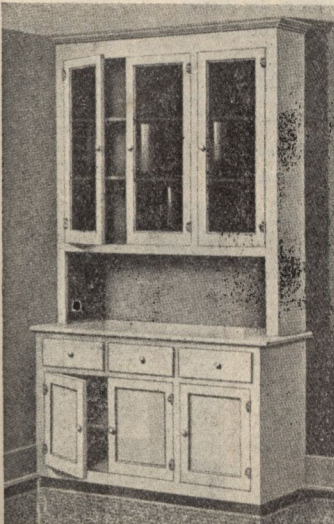

2785

This combination is featured by the use of Ironing Board Cabinet 2737 (Page 69) in corner. Other cabinets used are Lower Sections of 2702 (page 66) and 2708 (page 65) and Kitchen Cabinet 2716 (page 66). Size of cabinets used depends on space available.

GENERAL UTILITY CABINET - 49

A very unusual bargain.

Please Promptness Please

49

Here is a Kitchen or General Utility Cabinet that we make up in very large quantities and as a result are now naming the very low price shown below.

CLEAR WHITE PINE

Semi-K. D.—Carton Packed

These cabinets are 60 in. wide x 108 inches high, but can be easily reduced to 96 in. high, by sawing off at the top, midway, and bottom.

Lower part is 36 in. high x 18 in. deep with $1\frac{1}{2}$ in. Counter shelf and one shelf on cleats. Upper part is 72 in. high x 12 in. deep with three shelves on cleats. Drawers are $5\frac{1}{4}$ in. high with necessary slides for free operation. Upper doors are $47\frac{1}{2}$ in. high with wood stops for glass. Lower doors are 19 in. high with Fir panels. They are designed to set against rear and side wall so that no back and only one end is included. If extra End is Wanted, Add \$2.24.

No backs—no hardware, \$22⁵⁰ not painted.

Price each.....
If Glazed Clear D. S. or Fir
Panels, add.....\$2.50

ENGLISH

ENGLISH NOOK SETS

Perfectly Proportioned

Clear (1 1/4 in.) White Pine, except seat backs which are 1 in. White Pine with Fir panels. Exposed seat and table ends are "shallow routed" which presents a very attractive appearance when decorated in two tone color effect. Each set requires a floor space 64 to 68 in. wide x 54 in. deep, when occupied. Table is 26 in. wide x 48 in. deep x 30 in. high. Seats are 18 in. wide x 54 in. deep, x 36 in. high. Not painted or stained.

Price per Set—consisting of one table and two seats—all parts carefully fitted and sanded and then packed in dust-proof cartons.....

\$15⁵⁰

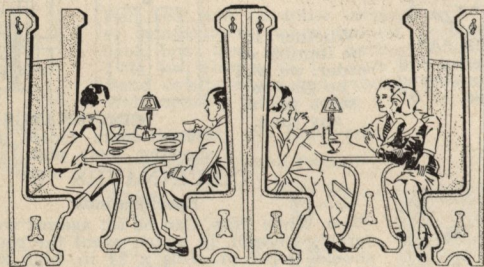

(Two sets placed back to back)

ENGLISH DUET SETS

Opposite illustration shows Two English Nook Sets placed back to back. A popular arrangement for Lunch Rooms, Soda Grilles, etc. (Double the price of Single Sets)

SPECIAL ENGLISH CAFE OR SODA GRILLE SETS

Ideal for Lunch Rooms, Soda Grilles, etc.

SPECIAL ENGLISH

Our Special English Sets are exactly the same as the regular English (as shown at top of this page) excepting that the seat backs are 5 ft. high and seat ends, 6 ft. high, thus providing greater privacy. In addition to above, both seats and tables can be reduced to 42 in. deep—on the job—if so desired. Ample space is provided for coat and hat hooks, but hooks are not included in the price. Not painted or stained.

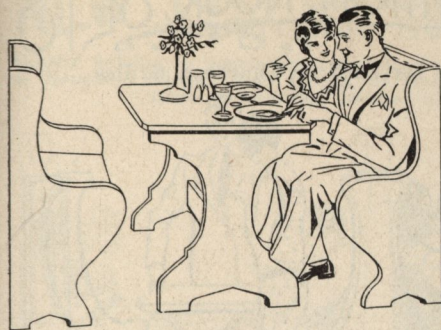

Price per Set—consisting of one table and two seats. Packed in dust proof carton. Large coat and hat hooks, with screws, dull brass finish, each, extra, ...10c

SPORTY COLLEGIATE LUNCH SETS

Attractive and Space Saving

COLLEGIATE

Made from Clear White Pine. Tables are 26 in. wide x 47½ in. deep x 29 in. high. Seats are 13 in. wide x 41 in. deep x 17 in. high and can be pushed under

table when desired, thus greatly economizing on floor space. It is not necessary to secure tables to the floor and consequently the entire set may be lifted out of the way if more floor space

is temporarily required. All exposed seat and table ends are ornamented with shallow routing and craft plug and pin, which presents a very attractive appearance when decorated in two tone effect. Each set (one table and two seats) requires a floor space of only 26 in. in width x 47½ in. in depth when not in use; or only 54 in. in width x 47 ½ in. in depth, when occupied. Not painted or stained.

Price per Set—Consisting of one table and two seats—all parts carefully fitted and sanded and then packed in dust proof paper carton

NEW YORK SANDWICH SHOPS

PARTITION NOOK SETS

Rapidly gaining in popularity—especially in the larger cities—for Sandwich or Doughnut Shops, Soda Grilles, or similar places requiring showy but space economizing fixtures at moderate prices.

NEW YORK

Made from Clear (1¼ in.) White Pine throughout, with the exception of seat backs which are made from 1 in. stock and have Fir Panels. All strongly constructed to withstand rough usage. Tables are 25 in. wide x 38 in. deep x 30 in. high. Single seats are 16 in. wide x 40½ in. deep x 72 in. high at ends and 60 in. high at backs. Double seats are 32 in. wide, otherwise same as single seats. All seats proper are 18 in. from floor at front and 17 in. from floor in rear. The ornamental tops of single seats are 5 in. wide and provide ample space for one large coat and hat hook, either on inside or outside, or both (hooks not included). Double seat ornamental tops are 10 in. wide, thus providing ample space for two large coat and hat hooks, either inside or outside. All single seat backs are finished so that the entire set can be used in center of floor if desired. Each single set (one table and two single seats) can be comfortably installed in a floor space of 59 x 40½ in., while a double set (two tables, two single seats, and one double seat) requires a floor space of 91 x 40½ in. when occupied.

Prices per Unit—not painted—no hardware or cushions—all parts carefully fitted and sanded and then packed in dust proof paper cartons.

for Casing..... **.25**

DE LUXE WOOD MEDICINE CABINETS

With Special Nickel Plated Sliding Hinges that make it easy to adjust the mirror at the most convenient angle to properly reflect the light—up to the full width of Cabinet.

65

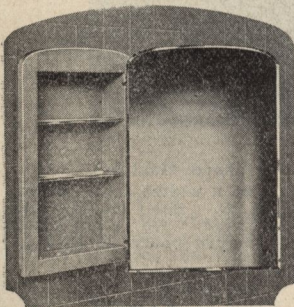

(With Door Closed)

CABINET

65

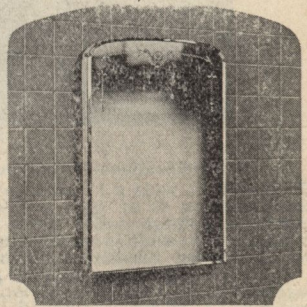

Rough size of wall opening is 14 in. wide x 21 in high x $3\frac{3}{4}$ in. deep. The box section of cabinet is of White Pine—fitted with Two Bulb-Edge Plate Glass shelves on adjustable Nickel Plated supports. Nickel Plated Automatic Spring Catch keeps door tightly closed when not in use. We also include a Special Wood Frame—to place back of mirror to give the mirror more background when so desired—but its use is optional with the customer.

Cabinet No. 65 complete, with Curved Top Venetian Plate Glass Mirror 16×24 in., with all nickel plated hardware included and applied with extra frame. Not painted or stained. All ready for installation. Packed in carton and **\$11⁶⁰**
crated in wood.....

65

(With door open, showing how mirror can be adjusted at most convenient angle to best reflect the light, and at the same time allow ready access to cabinet.)

66

(With door closed, showing the beautifully etched plate glass mirror.) No. 66 is exactly the same as No. 65 except with Etched **\$12⁸⁰**
Plate Glass Mirror.....

WHITE ENAMELED STEEL MEDICINE CABINETS

Original Designs of the Venetian Mirror Type
Beautifully Etched Bevel Plate Mirrors with either square or curved tops.

750-775

SPECIAL FEATURES

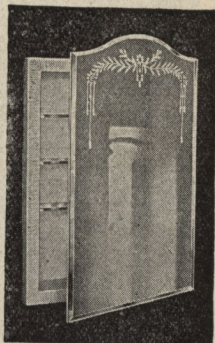

Doors held by nickel plated springs and chain door stops.

Space behind doors on hinge side, when open 90 degrees, is $\frac{3}{4}$ in., allowing Cabinet to be set in tile.

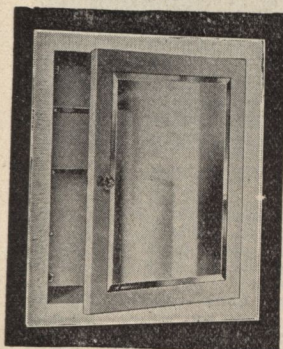

Mirrors rest on channel at bottom of door and have only two bolted rosettes at top.

Heavy double doors.

Mirror backed by Celotex pads, $\frac{5}{8}$ in. thick—which do away with all possibility of breakage.
